Situational Awareness, Critical Event Management & Analytics on a Single Pane of Glass

Assess

We consolidate and display all your risk alerts alongside your locations, assets and personnel with contextual information on one interactive map. From a single screen, your analysts can:

- Determine threat signal proximity to assets
- See critical intel for nearby locations
- Quickly establish a common operating picture, updated in real time.

Interactive common operating picture

Act

We provide a simple, uniform process for critical event management. With just a few clicks, your analysts can:

- Triage, watch or clear alerts as needed
- Collaborate effectively with local personnel
- Seamlessly connect to adjacent systems such as mass communication platforms
- Avoid operational disruptions.

Prioritize and respond with a few clicks

Topo.ai

Analyze

We provide a variety of automated reports related to threats, impacted assets, response times and more. Our integrated analytics module allows you to:

- Measure and improve team performance
- Identify and remedy recurring risks and supply chain disruption
- Identify vulnerabilities to inform risk management and business continuity
- Prove the strategic value of the security team.

Key performance indicators

> *"Topo.ai easily integrates multiple data points into a single map, but most importantly, it provides analysts and managers with the ability to evaluate multiple key performance indicator metrics to improve operations and report value-add to senior leaders."*
>
> Tony Rivera • McKesson

One Platform for Corporate Security Teams

In a world full of risk and disruptions to business operations, Topo.ai provides corporate security teams with situational awareness, critical event management and analytics on a single pane of glass. We filter out the noise and give your team the necessary intel to respond efficiently according to standard operating procedures. We deliver the analytics and insights you need to assess team performance and identify improvements. And we empower the security team to showcase its strategic value to the organization.

TopoONE™ software is cloud-based and highly configurable to address your organization's needs, risk profile and response protocols. It is easy to install and use, reducing the number of logins and steps needed to assess, act and analyze.

We invite you to learn more about how Topo.ai helps corporate security teams manage complex risk.
